Domestic Cables
Elsewedy Cables in Brief

Due to the huge demand of cables and energy in Syria and surrounding markets, ELSEWEDY CABLES Holding Co. has taken the Strategic decision to build ELSEWEDY CABLES-Syria Factory in Damascus on an area of 50,000 m² with Production capacity of 25,000 tons per annum with a workforce of 600 employees using the latest Manufacturing technology.

With our roots going back over 70 years, running successfully 30 production facilities in 12 Countries in Africa, Europe and Asian, Exporting our wide range of high quality and safe product to more than 110 countries worldwide. We are one of the world’s most experienced manufacturers and considered one of the oldest & most successful industrial and trading business groups across the MENA Region.

Elsewedy Cables' Mission is to become the world’s expert in cables with a strong financial basis and technical advanced product portfolio. Making it an attractive partner for all its stakeholders: shareholders, customers, suppliers and employees.
ELSEWEDY ELECTRIC

Group Structure

We are the leading integrated cables and electrical products manufacturer in the Middle East, with the specialty in providing complete and integrated energy Solutions in sectors as diverse as: Telecom Solutions, energy measurement and management, Turnkey Projects and Wind Energy Generation.

Our Business Sectors:

- **Wires & Cables**
  - Egytech
  - United Metals
  - Egyplast
  - United Wires
  - Elsewedy Cables
    - Egypt
    - Algeria
    - KSA

300/500 V– Copper Conductor

PVC insulated

### Construction

1. Copper conductor (class 5)
2. PVC Insulation

### Application

For internal wiring of equipment and protected installation in and on luminaires. Also for installation in conduit on and under plaster, but only for signalling systems.

### Location

In dry locations.

### Colors for core identification

Red, Blue, Black, Grey, Brown, Pink, Orange or G/Y is available.

300/500 V-CIRCULAR PVC SHEATHED CORDS™

CONSTRUCTION
1- Fine stranded Copper conductor (class 5)
2- PVC Insulation
3- PVC Sheath (White or Black)

APPLICATION
Location:
In dry locations; for domestic and cooking appliances only if there is no possibility of contact between the cable and hot parts of the appliance or other sources of heat; also in damp and wet locations.
Not in industrial or agricultural premises, but permitted in tailors shops and similar premises.

Permissible stress:
For connecting electrical appliances with medium mechanical stresses- e.g. washing machines, spin dryers, refrigerators etc..
The cables may be installed permanently- e.g. in furniture, decorative paneling, screens etc...
