

C0. Introduction

---

C0.1

---

## **(C0.1) Give a general description and introduction to your organization.**

Elsewedy Electric is a leading corporate in the MENA region, and a global provider of energy, digital and infrastructure solutions with total corporate revenues of 46.4B EGP in 2020, and over 15,000 employees setting our footprint worldwide. Listed on the Cairo stock exchange since 2006, we operate in five key business sectors: Wire & Cable, Electrical Products, Engineering & Construction, Smart Infrastructure and Infrastructure Investments. At the heart of our approach is an all-in-one integrated Engineering, Procurement & Construction (EPC) service which enables us to deliver even the most complex projects on time and within budget. We are pioneers of energy management and efficiency, and as part of our commitment to sustainability we have established green energy and smart metering projects across Africa, the Middle East and Eastern Europe.

A vital part of our mission is ensuring that the communities where we operate develop and flourish. Elsewedy Electric is committed to lead the way to sustainability across all its pillars, and have its greatest impact on all the communities they operate by and with, and we always strive to find ways of delivering clean energy, minimizing the environmental impacts of operations and sharing the benefits of success by investing in education and well-being. We have set our commitments towards contributing to our societies and planet and we aim to communicate it with all our stakeholders through our Sustainability Reports, and non-financial disclosures, such as S&P's Corporate Sustainability Assessment, and CDP's Water Security and Climate Change disclosures.

From the very start creating a better world was at the foundation of Elsewedy values. A family business created to improve energy systems for the country was the beginning of a sustainability journey that has developed and evolved over time. With substantial achievements reflected in our recent Sustainability Reports, we are ready to step up our ambition towards the next stage.

The year 2021 has been a year of challenges and achievements ever since it started, we have published our new group-wide Sustainability Strategy 2020-2023, which aims to fulfil our broader strategic vision and long-term commitments, distilled across four main pillars: *Planet & Resources*; *Technology & Innovation*; *Governance & Economy*; and *People & Communities*. It highlights the strategic measures which we will adopt over the short, medium and long term in line with the global commitments and targets. Furthermore, we conducted major reviews and updated our group's policies to extend contributions to sustainability, in addition to developing and publishing our Water and Climate Policies. 2021 also marks the year of disclosing for the first time to CDP's Water Security and Climate Change Questionnaires, as well S&P's CSA. Our target is to include 100% of our operational boundaries, and projects in the disclosures, enhance and improve our responses to quantitative data through establishing a corporate-wide Environmental and Social Management System in the upcoming year across all business lines worldwide, through which we will raise awareness and build our employees and business partners capacities to ensure all required E&S requirements and KPIs are periodically measured, monitored, and analyzed.

The boundaries covered in this questionnaire for which quantitative data are disclosed include six production facilities in Egypt owned and operated by Elsewedy Electric, in addition to one facility in Slovenia. These facilities are:

- 1) Egyplast
- 2) United Steel Wires (USW)
- 3) Iskraemeco Egypt
- 4) United Industries Company (UIC)
- 5) Elsewedy Transformers
- 6) Egytech Cables
- 7) Iskraemeco Slovenia

The above facilities represent 42.5% (19.7B EGP) of Elsewedy Electric's Group total corporate revenues for the FY 2020.

[Check out our latest GRI Sustainability Report 2018-2019:](https://www.elsewedyelectric.com/pdfView?file=/media/4233/sustainabilityreport-2018-2019.pdf) <https://www.elsewedyelectric.com/pdfView?file=/media/4233/sustainabilityreport-2018-2019.pdf>

Our 2020 Sustainability Progress Report is expected to be published by the end of 2021.

## **C0.2**

**(C0.2) State the start and end date of the year for which you are reporting data.**

	Start date	End date	Indicate if you are providing emissions data for past reporting years	Select the number of past reporting years you will be providing emissions data for
Reporting year	January 1 2020	December 31 2020	No	<Not Applicable>

**C0.3**

**(C0.3) Select the countries/areas for which you will be supplying data.**

Egypt  
Slovenia

**C0.4**

**(C0.4) Select the currency used for all financial information disclosed throughout your response.**

EGP

**C1. Governance**

**C1.1**

**(C1.1) Is there board-level oversight of climate-related issues within your organization?**

Yes

**C1.2**

**(C1.2) Provide the highest management-level position(s) or committee(s) with responsibility for climate-related issues.**

Name of the position(s) and/or committee(s)	Reporting line	Responsibility	Coverage of responsibility	Frequency of reporting to the board on climate-related issues
Other, please specify (Group CSR and Sustainability Director)	<Not Applicable>	Both assessing and managing climate-related risks and opportunities	<Not Applicable>	Half-yearly

**C1.3**

**(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?**

	Provide incentives for the management of climate-related issues	Comment
Row 1	No, not currently but we plan to introduce them in the next two years	

**C2. Risks and opportunities**

**C2.1**

**(C2.1) Does your organization have a process for identifying, assessing, and responding to climate-related risks and opportunities?**

Yes

**C2.3**

**(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?**

No

**C2.3b**

**(C2.3b) Why do you not consider your organization to be exposed to climate-related risks with the potential to have a substantive financial or strategic impact on your business?**

	Primary reason	Please explain
Row 1	Evaluation in process	Elsewedy has published this year their Sustainability Strategy and Climate policy and is embarking on developing an Environmental and Social Management System (ESMS) for the whole group before end of 2021. Once adopted and implemented , the ESMS will enable regular identification , assessment and mitigation of climate-related risks (and opportunities).

## C2.4

**(C2.4) Have you identified any climate-related opportunities with the potential to have a substantive financial or strategic impact on your business?**

Yes

### C2.4a

**(C2.4a) Provide details of opportunities identified with the potential to have a substantive financial or strategic impact on your business.**

**Identifier**

Opp1

**Where in the value chain does the opportunity occur?**

Direct operations

**Opportunity type**

Resource efficiency

**Primary climate-related opportunity driver**

Move to more efficient buildings

**Primary potential financial impact**

Reduced indirect (operating) costs

**Company-specific description**

Under the newly developed and published group ESG Strategy, targets are set for 20% reduction in energy consumption; and 100% green office buildings. Achieving these targets require implementation of energy efficiency and energy management measures in all our office buildings.

**Time horizon**

Medium-term

**Likelihood**

Very likely

**Magnitude of impact**

Medium

**Are you able to provide a potential financial impact figure?**

No, we do not have this figure

C5. Emissions methodology

C5.2

(C5.2) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.

- Defra Environmental Reporting Guidelines: Including streamlined energy and carbon reporting guidance, 2019
- IPCC Guidelines for National Greenhouse Gas Inventories, 2006
- ISO 14064-1
- The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)
- The Greenhouse Gas Protocol: Scope 2 Guidance

C6. Emissions data

C6.1

(C6.1) What were your organization's gross global Scope 1 emissions in metric tons CO2e?

**Reporting year**

**Gross global Scope 1 emissions (metric tons CO2e)**

13195

**Start date**

<Not Applicable>

**End date**

<Not Applicable>

**Comment**

This includes emissions resulting from the use of fossil fuels in our facilities and company owned vehicles

C6.2

(C6.2) Describe your organization's approach to reporting Scope 2 emissions.

**Row 1**

**Scope 2, location-based**

We are reporting a Scope 2, location-based figure

**Scope 2, market-based**

We have no operations where we are able to access electricity supplier emission factors or residual emissions factors and are unable to report a Scope 2, market-based figure

**Comment**

## C6.3

---

### (C6.3) What were your organization's gross global Scope 2 emissions in metric tons CO2e?

#### Reporting year

##### Scope 2, location-based

41442

##### Scope 2, market-based (if applicable)

<Not Applicable>

##### Start date

<Not Applicable>

##### End date

<Not Applicable>

##### Comment

Our scope 2 emissions include the emissions resulting from the consumption of purchased electricity from the national grid.

## C6.5

---

### (C6.5) Account for your organization's gross global Scope 3 emissions, disclosing and explaining any exclusions.

#### Purchased goods and services

##### Evaluation status

Relevant, calculated

##### Metric tonnes CO2e

378

##### Emissions calculation methodology

The aggregated consumption of our purchased goods was multiplied by sector specific cradle-to-gate emission factor obtained from DEFRA (UK Government GHG Conversion Factor).

##### Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

##### Please explain

#### Capital goods

##### Evaluation status

Relevant, not yet calculated

##### Metric tonnes CO2e

<Not Applicable>

##### Emissions calculation methodology

<Not Applicable>

##### Percentage of emissions calculated using data obtained from suppliers or value chain partners

<Not Applicable>

##### Please explain

Capital goods emissions are related to fuel use and electricity use during operations are reported under scope 1 and 2. Scope 3 capital goods emissions are not yet calculated because it involves a large amount of data that we do not currently have. ElSewedy Electric is currently working on a data collection and management system, and we expect to be able to provide a figure for capital goods emissions within the next 2 years.

#### Fuel-and-energy-related activities (not included in Scope 1 or 2)

##### Evaluation status

Relevant, calculated

##### Metric tonnes CO2e

5083

##### Emissions calculation methodology

To capture the maximum climate impacts of transportation, the Well-To-Tank emissions which falls under scope 3 (indirect emissions) were also calculated as part of ElSewedy Electric emissions. WTT emissions were calculated for all fuel and transportation activities (Owned vehicles fuel burning, leased coasters, employee commuting, and business air travel). Sector & fuel specific WTT emission factors were obtained from DEFRA (UK Government GHG Conversion Factor). Emissions resulting from water consumption and water treatment.

##### Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

##### Please explain

We are currently not provided by any data from our third party contractors.

## Upstream transportation and distribution

### Evaluation status

Not relevant, explanation provided

### Metric tonnes CO2e

<Not Applicable>

### Emissions calculation methodology

<Not Applicable>

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

<Not Applicable>

### Please explain

Included under scope 1 emissions, as the transportation of raw materials to our factories take place using our owned fleet.

## Waste generated in operations

### Evaluation status

Relevant, calculated

### Metric tonnes CO2e

561

### Emissions calculation methodology

Emissions from waste are calculated using methodologies and emission factors from Department for Environment Food and Rural Affairs (DEFRA). The emission factors include include collection, transportation and landfill emissions ('gate to grave').

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

### Please explain

We are currently not provided by any data from our third party contractors.

## Business travel

### Evaluation status

Relevant, calculated

### Metric tonnes CO2e

298

### Emissions calculation methodology

The emissions were calculated by multiplying the total distance travelled per passenger for each flight category (Domestic, short haul and long haul) by the corresponding emission factor. 22% of business travel emissions come from using third party services for land business travel. Sector & fuel specific emission factors were obtained from DEFRA (UK Government GHG Conversion Factor).

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

### Please explain

## Employee commuting

### Evaluation status

Relevant, calculated

### Metric tonnes CO2e

11631

### Emissions calculation methodology

Employee commuting using their private vehicles: The distance travelled per employee per year was computed and the total distance travelled by all employees was then multiplied by the corresponding emission factor to calculate indirect emissions from the total distance travelled by ElSewedy Electric employees. It was assumed that the type of vehicles used for transportation is average cars. Data were calculated by estimating the distance travelled by the employees, based on the branch's geographical locations and surveys on the average distance between the employees' homes and their work-sites. The travelling distance percentages for commuting were estimated for 11 different distances from 5 Km to 55+ Km, and then multiplied by the number of working days in a year to get the total distance travelled. Fuel specific emission factors were obtained from DEFRA (UK Government GHG Conversion Factor).

### Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

### Please explain

Not relevant
